PD8000 Mortise Locks with Surface Pulls for Sliding/Barn Doors

ADA Compliance

Our ADA compliant pocket door hardware meets the "no grasp", "no pinch" requirements of ADA Standard 4.13.9.

The pocket door opening must have a clear width of 36" according to the ADA Standard 404.2.3***. When sliding doors are fully open, operating hardware shall be exposed and usable from both sides.

To accommodate these requirements, the total pocket door opening must be a MINIMUM of 40". The door must protrude a minimum of 4" from the jamb in order to install the ADA pocket door hardware on the door.

The hardware must be installed 34" above the finished floor or ground, giving the hardware a height of 47" (the maximum is 48") from the finished floor, meeting ADA Standard 404.2.7***.

*** The ADA Standard 404.2.3 is from the Department of Justice ADA Publication dated September 15, 2012. Unison Hardware, Inc. recommends the end user to double check all State and Federal standards for your particular project.
